About DMXzone Supersized 2

Create an awesome fullscreen background slideshow that will convey the right message better than any text! The supersized images are displayed behind objects like menus, text fields or any other content that you have on your site. <u>DMXzone Supersized 2</u> is supplied with stylish navigation controls with keyboard support and CSS skins that you can choose from or edit to fit any website perfectly. You shouldn't worry about resizing anymore! All your images will become browser specific so regardless of the window size or the monitor size of your device the background images will be perfectly matched up.

Along with the great <u>HTML5 Data Bindings</u> integration, you can also use <u>DMXzone Database Connector</u> <u>PHP/ASP</u> and create dynamic slideshows with ease.

Features in Detail

*New marks features, not available in the older version

• NEW: Great integration with HTML5 Data Bindings - Supply the images, titles, descriptions and links for the DMXzone Supersized 2 from <u>HTML5 Data Bindings</u> local file or public feed.

Slides Data Source: json Dynamic Bindings Image: {{bigImg}} Thumbnail: {{tumbnailImg}} Title: {{title}} Link:	Fields: Cancel Image: Colored Bindings Field Fickup OK Image: Colored Bindings Field	

• NEW: DMXzone Supersized 2 directly from dynamic sources - Use <u>HTML5 Data Bindings</u> and <u>DMXzone</u> <u>Database Connector PHP/ASP</u> to connect to your images, titles, descriptions and more.

• NEW: 64bit Dreamweaver support - DMXzone Supersized 2 runs smoothly even on the latest 64bit update of Dreamweaver CC 2014.

• NEW: Advanced mobile support - The DMXzone Supersized 2 comes with awesome mobile support and now your slideshow looks great and loads super-fast on any mobile device.

• NEW: Super-smart image preloader - A super-smart image preloader loads only the necessary images and not all of them at once. You can add as many images as you want and it will still load super-fast.

• Live preview of the slideshow in Dreamweaver - You can simply switch from design to Live view and experience the slideshow directly in Dreamweaver.

• Fully responsive DMXzone Supersized 2 - It looks great on a desktop browser, phone or other mobile device.

• Integrated DMXzone Resizer - Resize all your images super-fast to a regular size for the DMXzone Supersized. The DMXzone Supersized requires images with the same size for the best effects and the built-in DMXzone Resizer slices and crops your images so they are just as required.

- Cool looking navigation control Fully stylable with CSS.
 - Show Next & Prev Navigation Displays next & prev navigation buttons.
 - Show Play/Pause button Displays a show/pause button.
 - Slides Counter Displays the number of slides in the slideshow.
 - Thumbnails Tray Generates a list of thumbnails that jump to the corresponding slide.
 - **Progress Bar** It runs based on the slide interval.
 - **Thumbnail Navigation** Toggles forward/backward thumbnail navigation. When on, thumbnails from the next/previous posts are generated and can be clicked to navigate.
 - o Slides Titles Displays the slides' titles
 - Enable Mouse Scrub The thumbnail list navigates left or right based on the mouse location.
 - Allow Keyboard Navigation Allows controls via keyboard.

Elements & Navigation		
Show Next & Prev Navigation		Thumbnails Navigation
Show Play/Pause button		Slides Titles
Slides Counter		Enable Mouse Scrub
Thumbnails Tray		Allow Keyboard Navigation
V Progress Bar	Paging Controls	Blank 👻

- Flexible background image positioning You can specify the image position to fit your website design.
 - Vertical Center Centers image vertically. When unchecked, the images resize/display top center if horizontal center is also unchecked.
 - **Fit Always** Prevents the image from ever being cropped. Ignores minimum width and height.
 - Horizontal Center Centers image horizontally. When unchecked, the images resize/display from the left of the page.
 - Fit Portrait Prevents the image from being cropped by locking it at 100% height
 - Protect Image Disables right clicking and image dragging using Javascript.

4 III >	

Usage

• Select one of the "Available Events" that this extension can trigger.

- To add a behavior, select it from the list of "Available Behaviors" and click the 🗼 icon.
- To add a custom javascript code use the abutton.
- To modify an existing behavior, select it from the list of "Attached Behaviors" and use the 🔌 button.

• If you use the 🔺 🔻 arrow buttons to change the order of "Attached Behaviors", keep in mind that thay will be applied in the same order at the browser.

Before you begin

Make sure to setup your site in Dreamweaver first before creating a page. If you don't know how to do that please <u>read this</u>.

Installing the extension

Read the tutorial at http://www.dmxzone.com/go/4671/how-to-install-extensions-from-dmxzone/

Login, download the product, and look up your serial at <u>http://www.dmxzone.com/user/products</u>

Get the latest DMXzone Extension Manager at http://www.dmxzone.com/go/22670/dmxzone-extension-manager-for-dreamweaver

Open DMXzone Extension Manager and go to your Purchased products tab and click install. If you have a subscription, the extension is to be found and installed in the Explore tab.

Get the latest extension manager from Adobe at http://www.adobe.com/exchange/em_download/

Open the .zxp file if you're using Dreamweaver CC or the .mxp file for Dreamweaver CS+ with Adobe Extension manager and install the extension.

If you experience any problems contact our Live Support!

The Basics: Creating a Fullscreen Bakcground Slideshow

In this tutorial we will show you how to create a fullscreen background slideshow, using $\underline{\mathsf{DMXzone\ Supersized\ 2}}$

*You can also check out the <u>video</u>.

1. From the insert panel (1) select DMXzone Supersized 2 (2).

2. First, select the **static image source option (1)**. We want to resize the images that we import, into our slideshow so we enable the **DMXzone Image Resizer option (2)**. If you've already resized your images, you can just turn this option off. Click the **import a folder with images button (3)**.

3. Select the **images source folder (1)** and the **destination folder (2)**. Enter the **new size** for the images and the size of the thumbnails (3). And **turn off the crop and sharpen options (4)** as we do not need them right now. When you're done, click OK.

In the advanced tab (1), you can select one of the predefined design presets (2), enable or disable the autoplay option and also you can select whether the slideshow should stop on the last slide or not (3). Adjust the elements and navigation options (4), which we leave to their defaults, and setup the slides and transitions options (5). Click OK, when you're done.

5. Now you can save your project and preview the result.

Advanced: Dynamic Fullscreen Background Slideshow

In this tutorial we will show you how to create a dynamic fullscreen background slideshow, using <u>DMXzone</u> <u>Supersized 2</u>.

*You can also check out the video.

How to do it

 We created a data source, using <u>HTML5 Data Bindings</u> and <u>DMXzone Database Connector PHP</u>/<u>ASP</u>. In the database we stored the path, title, thumbnail and link for each of our images. Let's add DMXzone Supersized 2 (2) from the insert panel (1).

ttml x	Insert Data Bindings DMXzone Ligh
